OBJECTIVE: PAPERLESS INDIA

To get better quality of life by maintaining common database for all citizens.

WORKING:

All data associate with citizen, will maintain in one place. Public or government can access and add from one common data base.

ADVANTAGES:

- By maintain all personal information at one place, we can remove identity cards and certificates (PAN, driving lenience passport etc.)
- No signs are required.
- No possibility fake certificates (education, work experience, disability etc.)
- Holding all properties is clear   and safer. Like land, automobiles, electronics, gold etc.
- Transferring property is easy because we have online bank transactions.
- Reservation will be assigned based on property holdings not by caste.
- Save tree by less use of paper.
- Govt schemes will reach all people and administration easy
- Traffic/road transport verification checks can be minimized
- By maintain health track of each citizen, no chance of Medical mafia
- Police investigation is become easy.
- Using smart watches is to provide full safety to women.
- True helpers will be beneficed.
- Farming demand and supply can be monetarized

BUSINESS:

First, we have to invest on infrastructure, later we give very cheaper and safer service to all Indians.

Permission is required from Indian government.

FUTURE:

- Easy to shift next generation Internet of things (IOT).
- If we make money is digital, it is like ALL PROBLEM and ONE SOLUTION.
